Profile

Employment History

Call Agent

from 01.08.2018 to 31.07.2021

Shoelando

I provided assistance and technical support to the customers in a friendly and polite manner

Junior Developer

from 01.08.2021 to 31.07.2023

SmartUp Software

I provided assistance to support continuous improvement throughout the development life cycle of computer applications and wrote basic code, maintain applications, address bugs, and deploy app enhancements.

Education

M.Sc. Machine Learning

from 01.09.2015 to 30.06.2018

University of Nottingham

I learned how to identify and use relevant computational tools and programming techniques, apply statistical and physical principles to break down algorithms, and explain how they work.

B.Sc. Computer Science

from 01.09.2012 to 30.06.2015

University of Manchester

The course focused on the study of computer systems and software development: it provided me with a solid foundation in computer science principles, as well as practical skills in programming, data structures, algorithms, and software engineering.

Application for: Senior Developer Low-Code / No-Code (a

jude.smiley.python@gmail.com

to me

Dear Hiring Manager,

I am writing to express my strong interest in the Working Student Cloud Services position at Adobe. With a passion for technology and a solid foundation in web development, I am excited about the opportunity to join a dynamic team.

My educational background includes a PHP and MySQL Developer course at Avantaj Consulting Institute in Berlin, where I completed a Python Back-end Developer course at DCI Digital Career Institute GmbH in Berlin, with a focus on Django, APIs, and cloud services.

I believe that my technical skills, along with my curiosity about application and infrastructure security, make me a strong candidate for this role. I have experience reading and writing code in various programming languages, including JavaScript, Python, and Java, as well as building user interfaces and shell scripts. My education and training have equipped me with a basic understanding of cloud services and systems.

What excites me about the Working Student Cloud Services position at Adobe is the opportunity to work in a fast-paced, innovative service environment. I am dedicated to ensuring that large-scale web services are designed, developed, and deployed with a focus on scalability, security, and a willingness to speak up when necessary align with Adobe's commitment to excellence.

Furthermore, I am fluent in English and am eager to learn German to enhance my communication skills and better integrate into the team. My technical skills, along with my commitment to teamwork and self-organization, make me a valuable addition to your Compliance team.

Thank you for considering my application. I look forward to the possibility of contributing to Adobe's mission and growing with your team. Please feel free to reach out to me at your earliest convenience to discuss my qualifications in more detail.

Sincerely,

John Doe
