Profile

Employment History

Call Agent - Shoelando

from 01.08.2018 to 31.07.2021

I provided assistance and technical support to the customers in a friendly and polite manner

Junior Developer - SmartUp Software

from 01.08.2021 to 31.07.2023

I provided assistance to support continuous improvement throughout the development life cycle of computer applications and wrote basic code, maintain applications, address bugs, and deploy app enhancements.

Education

M.Sc. Machine Learning - University of Nottingham

from 01.09.2015 to 30.06.2018

I learned how to identify and use relevant computational tools and programming techniques, apply statistical and physical principles to break down algorithms, and explain how they work.

B.Sc. Computer Science - University of Manchester

from 01.09.2012 to 30.06.2015

The course focused on the study of computer systems and software development: it provided me with a solid foundation in computer science principles, as well as practical skills in programming, data structures, algorithms, and software engineering.

Application for: Senior Developer Low-Code / No-Code (a

jude.smiley.python@gmail.com

to me

Dear Hiring Manager,

I am writing to express my strong interest in the Working Student Cloud Services position at Adobe. With a passion for technology and a solid foundation in web development, I am excited about the opportunity to join a dynamic team.

My educational background includes a PHP and MySQL Developer course at Avantaj Consulting in Berlin, where I developed a complex web application with a login system and user interface. I also completed a Python Back-end Developer course at DCI Digital Career Institute GmbH in Berlin, where I gained experience with Django, APIs, and cloud services.

I believe that my technical skills, along with my curiosity about application and infrastructure security, make me a strong candidate for this role. I have experience reading and writing code in various programming languages, including JavaScript, Python, and Java. My education and training have equipped me with a basic understanding of web development and systems.

What excites me about the Working Student Cloud Services position at Adobe is the opportunity to work in a fast-paced service environment. I am dedicated to ensuring that large-scale web services are designed, developed, and deployed with high quality and a strong commitment to excellence.

Furthermore, I am fluent in English and am eager to learn German to enhance my communication skills. My technical skills, along with my commitment to teamwork and self-organization, make me a valuable addition to your Compliance team.

Thank you for considering my application. I look forward to the possibility of contributing to Adobe's mission. Please feel free to reach out to me at your earliest convenience to discuss my qualifications in more detail.

Sincerely,

John Doe

Let's practice
before!

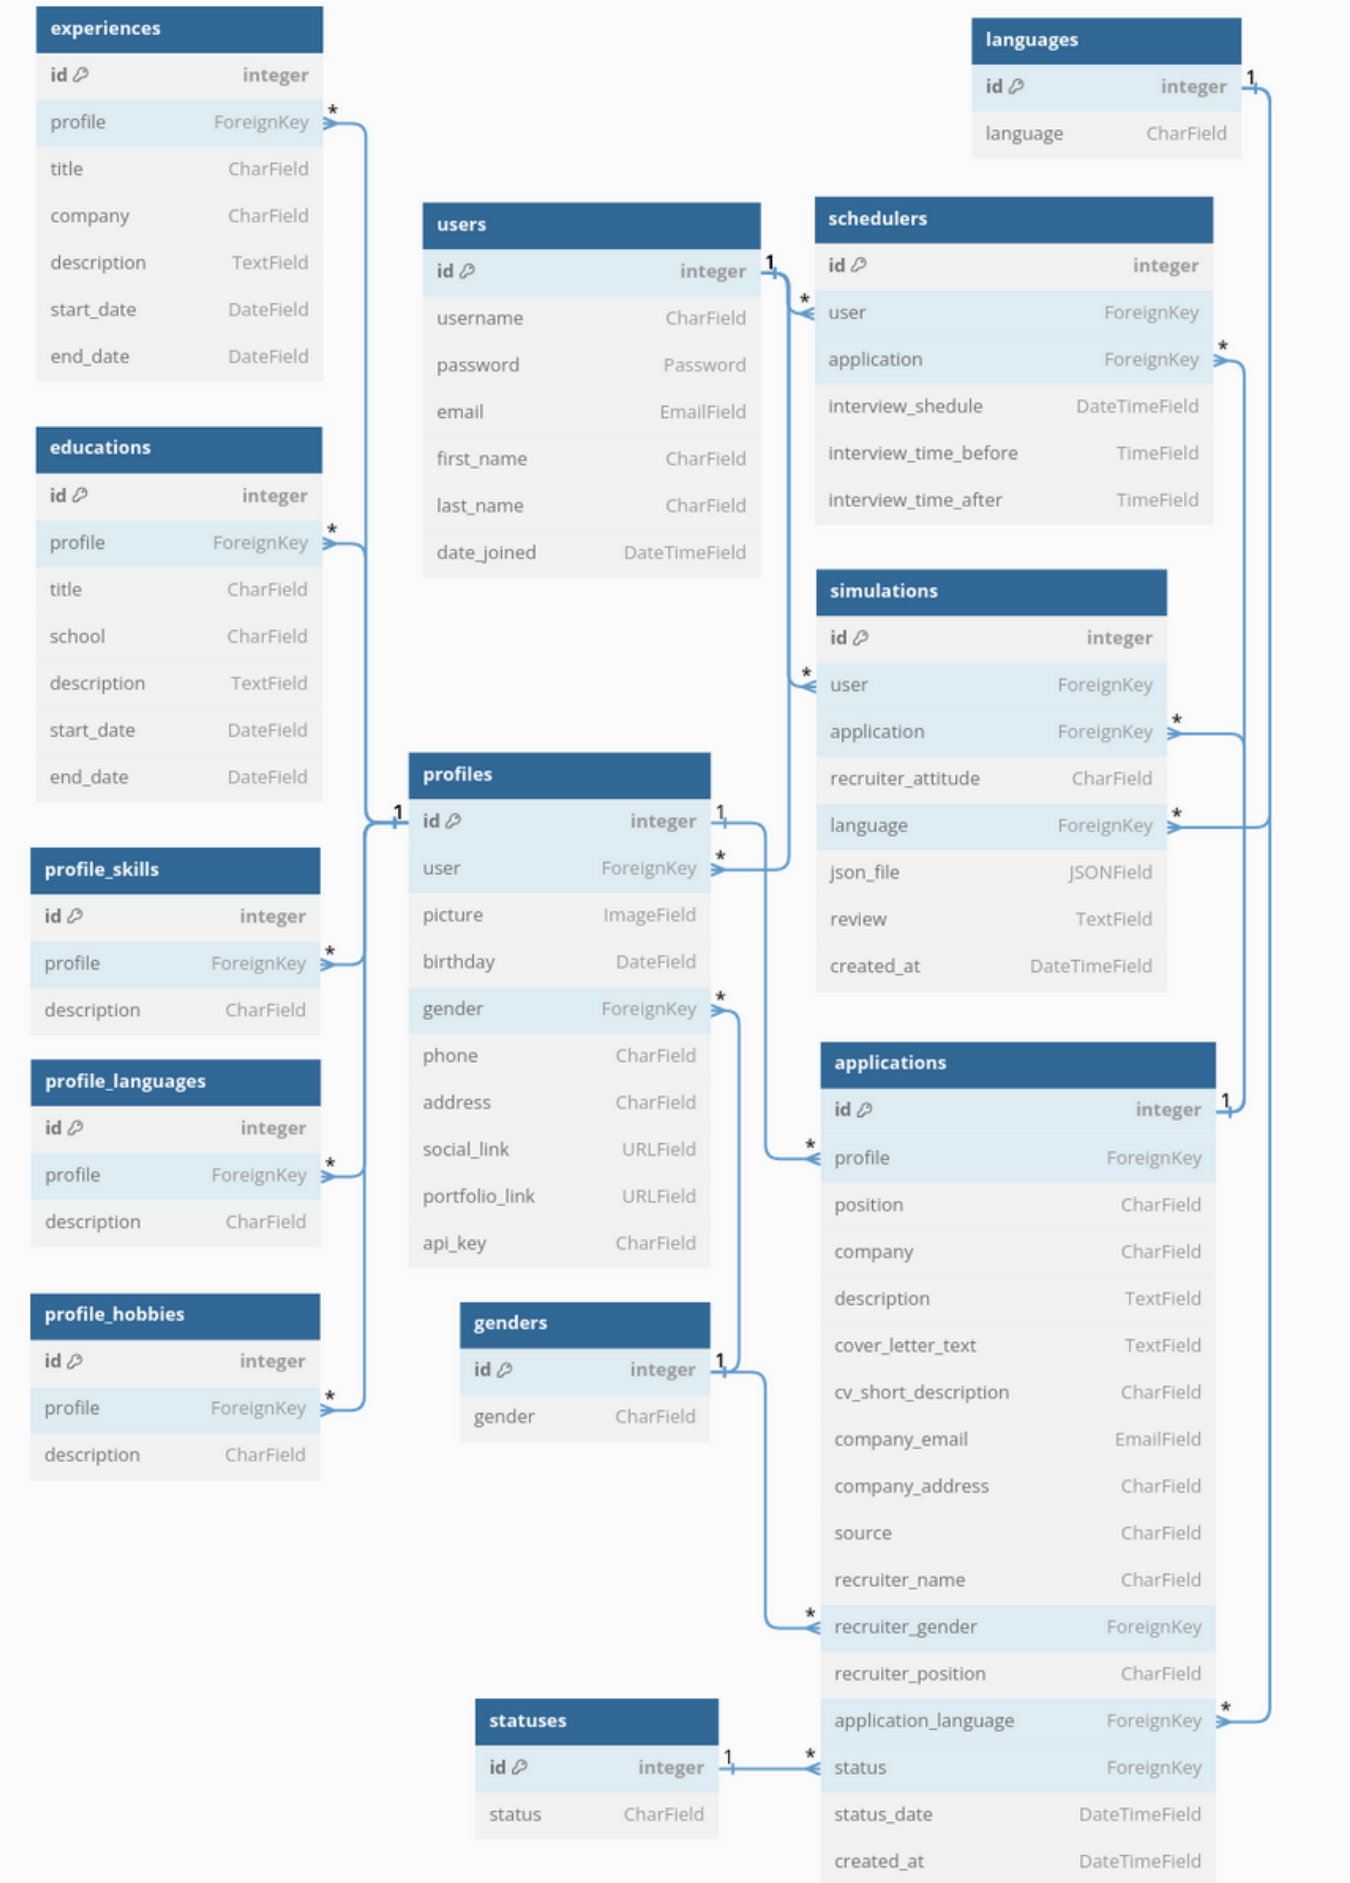

For our project, we collaborated using the basics of the Agile methodology and a Kanban board...

It is written in Python,
has its own database
and it is built on an API
web framework

django

REST
framework

...and we connected the back-end to the front-end using the API end-points.
